

JESA Calls for Manuscript Submissions

Journal of Environment and Sustainable Agriculture (JESA) is a peer-reviewed open-accessed journal, which is quarterly published by **todayscience.org** on behalf of Science and Education Centre of North America (**SECNA**).

EEAS is a multidisciplinary journal concerned with all aspects on interactions which occur between agricultural development and environment, specifically how agricultural activities influence the environment, how changes in that environment impact agro-ecosystems, and how to secure and promote sustainability in agriculture, food and forest systems. Its purpose is to seek ways and means for achieving sustainability in all agricultural activities aimed at such development. The scopes of the journal include, but are not limited to, the following topics: biodiversity, bio-resources and sustainability of agricultural systems; impacts of biotechnology, organic agriculture and agricultural engineering on environment; aquatic ecology and fishery; agro-ecosystems and natural environment; impacts of soil degradation, irrigation, and waste management on agro-ecosystems and environment; land use, air and water quality, energy use, climate change on agricultural sustainability; policy analysis and monitoring; and integrated solutions for environmental goal and agricultural sustainability. Both theoretical and empirical contributions are welcome. This journal is currently published in both printed and online versions. The full texts are free access and download from online database.

We are seeking submissions for forthcoming issues. All papers should be written in professional English. The length of 2500-9500 words is suggested. A paper template of accepted submission is available on our website <http://www.todayscience.org/authorguide.html>. All manuscripts should be prepared in MS-word format, and submitted via email: jesa@todayscience.org or in **one way ONLY**.

Please well record your date and way of paper submission.

If your article is rejected after reviewing, the correspondence author will know this result within **7 weeks** from the date of paper submission; if your article is qualified and finally published, it is expected to be published within **7 months** from the date of paper submission.

Papers Selected and Published Process

- a) Upon receipt of paper submission, the Editor sends an E-mail of acknowledgement to the correspondence author within **7 days**. If you fail to receive such a confirmation, your email/submission may be missing. Please contact the Editor in charge, at your first convenience.
- b) Peer reviews. We use double-blind system for peer reviewing; the reviewers' identities remain anonymous to the authors. The paper will be peer reviewed by three experts: one is the editor of **JESA**, and the other two are external reviewers. The review process may take **3-7 weeks**.
- c) Notification of the results of review by e-mail.
- d) If the paper is accepted, the author(s) revise paper accordingly based on comments from reviewers.
- e) The author(s) proofread the edited paper, and pay publication fees. Publication of an article in

JESA is not contingent upon the author's ability to pay the fees.

- f) After publication, the correspondence author will receive **two free copies** of printed journals from Toronto, Canada.

Requirements and copyrights

Submission of an article implies that the work described has **not** been publicly published previously, neither is under consideration for publication elsewhere, and that its publication is approved by all authors and tacitly or explicitly by the responsible authorities where the work was carried out. And submission implies that, if accepted, it will not be published in the same form, in English or in any other languages, without the written consent of the Publisher. Editor(s) reserve the rights to edit or otherwise after all contributions, but authors will receive proofs for approval before publication.

The authors retain copyrights for articles published in **JESA**, with first publication right granted to the journal. The journal/publisher is not responsible for subsequent uses of the work. It is the authors' responsibility to bring an infringement action if so desired by the authors.

The journal publishes theoretical articles and empirical studies concerned with all aspects on interactions which occur between agricultural development and environment, specifically how agricultural activities influence the environment, how changes in that environment impact agro-ecosystems, and how to secure and promote sustainability in agriculture, food and forest systems. Its purpose is to seek ways and means for achieving sustainability in all agricultural activities aimed at such development.. Both theoretical and empirical contributions are welcome.

List of relevant subjects

- Biodiversity, bio-resources and sustainability of agricultural, food, and forest systems
- Impacts of biotechnology, organic agriculture and agricultural engineering on environment
- Aquatic ecology and fishery
- Agro-ecosystems and natural environment
- Impacts of soil degradation, irrigation, and waste management on agro-ecosystems and environment
- Land use, air and water quality, energy use, climate change on agricultural sustainability
- Policy analysis and monitoring
- Integrated solutions for environmental goal and agricultural sustainability
